

CLAIMS

What is claimed is:

- 1.) An anticancer drug ET in which E comprises one or more effector agents that
5 evoke tumor cell killing and T comprises:
- a) A group referred to as a "tumor selective targeting ligand" which selectively binds to a target receptor that is increased on the surface of the tumor cell or in the microenvironment of the tumor cell compared to that for vital normal cells; and
 - 10 b) One or more of the following:
 - I. A tumor selective targeting ligand;
 - II. A group, referred to as a "masked intracellular transport ligand" which can be modified in vivo to give a group referred to as an "intracellular transport ligand" which binds to a tumor cell receptor that actively transports bound ligands into the tumor cell;
 - 15 III. A group referred to as a "trigger" that can be modified in vivo, wherein in vivo modification activates the trigger and modulates the pharmacological activity PA;
 - IV. A group referred to as an "intracellular trapping ligand", which binds to
20 one or more intracellular receptors or a group referred to as a "masked intracellular trapping ligand" which can be modified in vivo to give an "intracellular trapping ligand";

and wherein, when a second targeting ligand is present in T then the first and second targeting ligands can bind simultaneously to two targeting receptor molecules;

- 5 and wherein when T consists of a targeting ligand and a trigger, and when in vivo modification of said trigger increases the tumor killing activity, the in vivo modification which activates said trigger, is caused by an enzyme or enzymatic activity that is increased at tumor cells or decreased at vital normal cells;

and wherein when T consists of a targeting ligand and a trigger, and when in vivo modification of said trigger decreases the tumor killing activity, the in vivo modification which activates said trigger, is caused by an enzyme or enzymatic activity that is decreased at tumor cells or increased at vital normal cells;

and provided that T is not an antibody, or an analog or component of an antibody, or a complex of antibodies, or a bispecific antibody, or an analog of a bispecific antibody, or a natural protein, or a complex of natural proteins, or a protein, or a naturally occurring polymer, or a radiolabelled dimer, or a polymer to which is attached, at multiple sites, one or more cytotoxic drugs.

2.) An anticancer drug ET of claim 1 comprised of the following groups:

- I. N1 targeting ligands, which may differ;
- II. N2 masked intracellular transport ligands which may differ;

III. N3 triggers, which may differ, designated "detoxification triggers" wherein activation of the trigger decreases the toxicity of the drug;

IV. N4 effector agents which may differ;

5 V. N5 triggers which may differ, wherein activation of the trigger increases the toxicity of the drug;

VI. N6 intracellular trapping ligands or masked intracellular trapping ligands, which may differ;

and wherein:

10 N1 = 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, or about 10; N2 = 0, 1, 2, 3, 4, 5 or about 5;
N3 = 0, 1, 2, 3, 4, 5, or about 5; N4 = 1, 2, 3, 4, 5, or about 5;
N5 = 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, or about 10;
N6 = 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, or about 10;

15 3.) A compound of claim 2 in which:

N1 = 1, 2, 3, or 4; N2 = 0, 1, or 2;
N3 = 0, 1, or 2; N4 = 1, 2, or 3;
N5 = 0, 1, 2, or 3; N6 = 1, 2, or 3;

20 4.) A compound of claim 3 wherein:

N1=1, N2=0, N3=1, N4=1, N5=0, and N6=0;

N1=1, N2=0, N3=0, N4=2, N5=0, and N6=0;

5.) An anticancer drug of ~~claim 4~~ in which the targeting ligands selectively bind to target receptors on the surface of the tumor cell or in the microenvironment of the tumor cell, wherein the concentration of the target receptor is greater on the surface

of the tumor cell or in the microenvironment of the tumor cell than on the surface or in the microenvironment of vital normal cells or normal cells.

5 6.) A compound of claim 4, with two targeting ligands that selectively bind to target receptors on the surface of the tumor cell or in the microenvironment of the tumor cell, wherein the concentration of the target receptors is greater on the surface of the tumor cell or in the microenvironment of the tumor cell than on the surface or in the microenvironment of vital normal cells or normal cells.

10 7.) A compound of claim 6 in which the targeting ligands are different and bind to different types of targeting receptors.

15 8.) A compound of claim 4, with three targeting ligands that selectively bind to target receptors on the surface of the tumor cell or in the microenvironment of the tumor cell, wherein the concentration of the target receptors is greater on the surface of the tumor cell or in the microenvironment of the tumor cell than on the surface or in the microenvironment of vital normal cells or normal cells.

20 9.) Anticancer drug of claim 4 comprised of two or more targeting ligands, wherein at least one of the targeting ligands binds to a target receptor on the surface of the target cell or in the microenvironment of the target cell, wherein the target has an increased amount of that target receptor compared to a nontarget cell that binds to a second targeting ligand of the compound.

10.) A compound of claim 4 in which the effector agent is comprised of a cytotoxic drug.

11.) A compound of claim 4 in which the effector agent is comprised of a
5 radionuclide.

12.) A compound of claim 4 in which the effector agent is comprised of a drug that stimulates the immune system.

10 13.) A compound of claim 4 in which the effector agent is comprised of a group that can irreversibly chemically modify one or more tumor components.

15 14.) A compound of claim 4 in which ET is comprised of an anticancer drug with two targeting ligands at least one of which binds to a target receptor selected from the following list:

- 1) a cathepsin type protease
- 2) a collagenase
- 3) a gelatinase
- 4) a matrix metalloproteinase
- 20 5) a membrane type matrix metalloproteinase
- 6) alpha v beta 3 integrin
- 7) bombesin/gastrin releasing peptide receptors
- 8) cathepsin B
- 9) cathepsin D

- 10) cathepsin K
- 11) cathepsin L
- 12) cathepsin O
- 13) fibroblast activation protein
- 5 14) folate binding receptors
- 15) gastrin/cholecystokinin type B receptor
- 16) glutamate carboxypeptidase II or (PSMA)
- 17) guanidinobenzoatase
- 18) laminin receptor
- 10 19) matrilysin
- 20) matipase
- 21) melanocyte stimulating hormone receptor
- 22) nitrobenzylthioinosine-binding receptors
- 23) norepinephrine transporters
- 15 24) nucleoside transporter proteins
- 25) peripheral benzodiazepam binding receptors
- 26) plasmin
- 27) seprase
- 28) sigma receptors
- 20 29) somatostatin receptors
- 30) stromelysin 3
- 31) trypsin
- 32) urokinase
- 33) MMP 1

- 34) MMP 2
- 35) MMP 3
- 36) MMP 7
- 37) MMP 9
- 5 38) Membrane type matrix metalloproteinase I
- 39) MMP 12
- 40) MMP 13

15.) An anticancer drug of claim 4 comprised of one targeting ligand that binds the first target receptor (a1) and a second targeting ligand that binds to the second target receptor (a2) indicated in the pairs of (a1 --- a2) listed below:

urokinase --- a cathepsin type protease; urokinase --- a collagenase; urokinase --- a gelatinase; urokinase --- a matrix metalloproteinase; urokinase --- a membrane type matrix metalloproteinase; urokinase --- alpha v beta 3 integrin; urokinase --- bombesin/gastrin releasing peptide receptors; urokinase --- cathepsin B; urokinase --- cathepsin D; urokinase --- cathepsin K; urokinase --- cathepsin L; urokinase --- cathepsin O; urokinase --- fibroblast activation protein; urokinase --- folate binding receptors; urokinase --- gastrin/cholecystokinin type B receptor; urokinase --- glutamate carboxypeptidase II or (PSMA); urokinase --- guanidinobenzoate; urokinase --- laminin receptor; urokinase --- matrilysin; urokinase --- matrilysin; urokinase --- melanocyte stimulating hormone receptor; urokinase --- nitrobenzylthioinosine-binding receptors or (nucleoside transporter); urokinase --- norepinephrine transporters; urokinase --- nucleoside transporter proteins; urokinase --- peripheral benzodiazepam binding receptors; urokinase ---

plasmin; urokinase --- seprase; urokinase --- sigma receptors; urokinase ---
 somatostatin receptors; urokinase --- stromelysin 3; urokinase --- trypsin;
 urokinase --- urokinase; urokinase --- MMP 1; urokinase --- MMP 2;
 urokinase --- MMP 3; urokinase --- MMP 7; urokinase --- MMP 9; urokinase ---
 5 membrane type matrix metalloproteinase I; urokinase --- MMP 12; urokinase ---
 MMP 13; urokinase --- a tumor antigen; plasmin --- a cathepsin type protease;
 plasmin --- a collagenase; plasmin --- a gelatinase; plasmin --- a matrix
 metalloproteinase; plasmin --- a membrane type matrix metalloproteinase;
 plasmin --- alpha v beta 3 integrin; plasmin --- bombesin /gastrin releasing peptide
 10 receptors; plasmin --- cathepsin B; plasmin --- cathepsin D; plasmin --- to
 cathepsin K; plasmin --- cathepsin L; plasmin --- cathepsin O; plasmin ---
 fibroblast activation protein; plasmin --- folate binding receptors; plasmin ---
 gastrin/cholecystokinin type B receptor; plasmin --- glutamate carboxypeptidase II
 or (PSMA); plasmin --- guanidinobenzoate; plasmin --- laminin receptor;
 15 plasmin --- matrilysin; plasmin --- matrilysin; plasmin --- melanocyte stimulating
 hormone receptor; plasmin --- nitrobenzylthioinosine-binding receptors or
 (nucleoside transporter); plasmin --- norepinephrine transporters; plasmin ---
 nucleoside transporter proteins; plasmin --- peripheral benzodiazepam binding
 receptors; plasmin --- plasmin; plasmin --- seprase; plasmin --- sigma
 20 receptors; plasmin --- somatostatin receptors; plasmin --- stromelysin 3;
 plasmin --- trypsin; plasmin --- urokinase; plasmin --- MMP 1; plasmin --- MMP
 2; plasmin --- MMP 3; plasmin --- MMP 7; plasmin --- MMP 9; plasmin ---
 membrane type matrix metalloproteinase I; plasmin --- MMP 12; plasmin ---
 MMP 13; plasmin --- a tumor antigen; a collagenase --- a cathepsin type

protease; a collagenase --- a collagenase; a collagenase --- a gelatinase; a
 collagenase --- a matrix metalloproteinase; a collagenase --- a membrane type
 matrix metalloproteinase; a collagenase --- alpha v beta 3 integrin; a
 collagenase --- bombesin /gastrin releasing peptide receptors; a collagenase ---
 5 cathepsin B; a collagenase --- cathepsin D; a collagenase --- to cathepsin K; a
 collagenase --- cathepsin L; a collagenase --- cathepsin O; a collagenase ---
 fibroblast activation protein; a collagenase --- folate binding receptors; a
 collagenase --- gastrin/cholecystokinin type B receptor; a collagenase ---
 glutamate carboxypeptidase II or (PSMA); a collagenase ---guanidinobenzoatase;
 10 a collagenase --- laminin receptor; a collagenase --- matrilysin; a collagenase ---
 matripase; a collagenase --- melanocyte stimulating hormone receptor;
 a collagenase --- nitrobenzylthioinosine-binding receptors or (nucleoside
 transporter); a collagenase --- norepinephrine transporters; a collagenase ---
 nucleoside transporter proteins; a collagenase --- peripheral benzodiazepam
 15 binding receptors; a collagenase --- seprase; a collagenase --- sigma receptors;
 a collagenase --- somatostatin receptors; a collagenase --- stromelysin 3; a
 collagenase --- trypsin; a collagenase --- a collagenase; a collagenase --- MMP 1;
 a collagenase --- MMP 2; a collagenase --- MMP 3; a collagenase --- MMP 7;
 a collagenase --- MMP 9; a collagenase --- membrane type matrix
 20 metalloproteinase I; a collagenase --- MMP 12; a collagenase --- MMP 13;
 a collagenase --- a tumor antigen; a gelatinase --- a cathepsin type protease;
 a gelatinase --- a gelatinase; a gelatinase --- a matrix metalloproteinase;

16.) A compound of claim 15 that is also comprised of a third targeting ligand
receptor that binds to a receptor that is present at increased amounts at a tumor
cell compared to at a normal cell.

10 17.) A compound of claim 16 in which the third targeting ligand binds to PSMA or
glutamate carboxypeptidase II.

15 18.) A compound of claim 4 in which the effector agent of ET is comprised of a
group with the structure RN-L-V, wherein RN is a group that binds to the target
biomolecule referred to as "rn"; and L is a linker, and V is a group that can
covalently modify the target rn; and wherein RN-L-V can bind to rn and irreversibly
chemically modify rn.

20 19.) A compound of claim 18 in which V is comprised of a chemical group that
generates free radicals and wherein the generated free radicals irreversibly
chemically modify the target biomolecule rn.

25 20.) A compound of claim 19 in which the free radical generator V is a non-
radioactive metal- chelator complex.

21.) A compound of claim 13 in which the effector agent is comprised of a structure that is modified by the enzymatic activity of a biomolecule and wherein this modification inactivates said biomolecule and in the process irreversibly chemically modifies said biomolecule.

5

22.) A compound of claim 4 further comprising a second group wherein said second group binds to a receptor present in increased amounts at a target cell compared to at a non-target cell and wherein said second group is comprised of:

- I. a monoclonal antibody; or
- 10 II. targeting receptor binding fragment of a monoclonal antibody; or
- III. an analog or derivative which bears amino acid sequence similarity to portions of a monoclonal antibody; or
- IV. a natural protein, or a complex of natural proteins, or a protein; or
- V. a naturally occurring polymer.

15

23.) A compound with a group, referred to as a "masked intracellular transport ligand" which can be modified in vivo to give a group referred to as an "intracellular transport ligand" which binds to a cell receptor that actively transports bound ligands into the cell.

20

24.) A method of stimulating an immune response against a tumor and for treating a patient with cancer which comprises the following steps:

- I. Immunizing or sensitizing a patient to a compound referred to as a
- 25 neoantigen; and

II. Administering to the patient a compound referred to as a neoantigen generating compound; wherein said compound can irreversibly chemically modify a component of the tumor resulting in the generation of said neoantigen at the tumor.

5 25.) A method of claim 24, in which the tumor component modified is selected from the following list:

- | | |
|----|---|
| 10 | 1) Prostate specific Antigen |
| | 2) Human glandular kallikrein 2 |
| | 3) Prostatic acid phosphatase |
| | 4) Plasmin |
| | 5) Placental type alkaline phosphatase |
| | 6) Matriptase |
| | 7) Matrix metalloproteinases |

| | 17) Mitogen activated protein kinase |
| | 18) Thymidylate synthase |
| 25 | 19) Protein kinase A |
| | 20) Fibroblast activation protein/ seprase |
| | 21) P-glycoprotein |

26.) A method of stimulating an immune response against a tumor and for treating a patient with cancer which comprises the following steps:

- I. Immunizing or sensitizing a patient to a compound referred to as a neoantigen; and
- 5 II. Administering to the patient a compound of claim 13 referred to as a neoantigen generating compound; wherein said compound can irreversibly chemically modify a component of the tumor resulting in the generation of said neoantigen at the tumor.

27.) A set of anticancer drugs referred to as "E1T1" and "E2T2" for use together or
10 for co-administration to a patient, wherein E1 and E2 are effector agents that exhibit synergistic toxicity to a cell; and wherein T1 comprises a targeting ligand that binds to a first target receptor and T2 comprises a second targeting ligand that binds to the second target receptor which is increased on a tumor cell compared to a normal cell and where the first targeting ligand binds to a targeting receptor selected from
15 the following list:

- 1) a cathepsin type protease
- 2) a collagenase
- 3) a gelatinase
- 4) a matrix metalloproteinase
- 20 5) a membrane type matrix metalloproteinase
- 6) alpha v beta 3 integrin
- 7) bombesin /gastrin releasing peptide receptors
- 8) cathepsin B

- 9) cathepsin D
- 10) cathepsin K
- 11) cathepsin L
- 12) cathepsin O

- 34) MMP 2
- 35) MMP 3
- 36) MMP 7
- 5 37) MMP 9
- 38) Membrane type matrix metalloproteinase I
- 39) MMP 12
- 40) MMP 13

10 28.) A set of compounds of claim 27 wherein the effector agent E1 inhibits the denovo synthesis of a biomolecule(s) that is necessary for cell replication and/or survival, and the effector agent E2 inhibits a salvage pathway(s) that can enable a cell to by- pass the metabolic block caused by E1.

15 29.) A set of compounds of E1T1 and E2T2 of claim 28 wherein T1 comprises a targeting ligand that binds to the first target receptor (a1); and T2 comprises a second targeting ligand that binds to the second target receptor (a2) indicated in the pairs of (a1 --- a2) listed below:

- 1) urokinase --- a cathepsin type protease;
- 20 2) urokinase --- a collagenase;
- 3) urokinase --- a gelatinase;
- 4) urokinase --- a matrix metalloproteinase;
- 5) urokinase --- a membrane type matrix metalloproteinase;
- 6) urokinase --- alpha v beta 3 integrin;

- 5
- 10
- 15

- 7) urokinase --- bombesin /gastrin releasing peptide receptors;
 - 8) urokinase --- cathepsin B;
 - 9) urokinase --- cathepsin D;
 - 10) urokinase --- to cathepsin K;
 - 11) urokinase --- cathepsin L;
 - 12) urokinase --- cathepsin O;
 - 13) urokinase --- fibroblast activation protein;
 - 14) urokinase --- folate binding receptors;
 - 15) urokinase --- gastrin/cholecystokinin type B receptor;
 - 16) urokinase --- glutamate carboxypeptidase II or (PSMA);
 - 17) urokinase --- guanidinobenzoatase;
 - 18) urokinase --- laminin receptor;
 - 19) urokinase --- matrilysin;
 - 20) urokinase --- matripase;
 - 21) urokinase --- melanocyte stimulating hormone receptor;
 - 22) urokinase --- nitrobenzylthioinosine-binding receptors or (nucleoside transporter);
 - 23) urokinase --- norepinephrine transporters;
 - 24) urokinase --- nucleoside transporter proteins;
 - 25) urokinase --- peripheral benzodiazepam binding receptors;
 - 26) urokinase --- plasmin;
 - 27) urokinase --- seprase;
 - 28) urokinase --- sigma receptors;
 - 29) urokinase --- somatostatin receptors;

- 5 30) urokinase --- stromelysin 3;
31) urokinase --- trypsin;
32) urokinase --- urokinase;
33) urokinase --- MMP 1;
34) urokinase --- MMP 2;
35) urokinase --- MMP 3;
36) urokinase --- MMP 7;
37) urokinase --- MMP 9;
10 38) urokinase --- membrane type matrix metalloproteinase 1;
39) urokinase --- MMP 12;
40) urokinase --- MMP 13;
41) urokinase --- a tumor antigen;
42) plasmin --- a cathepsin type protease;
43) plasmin --- a collagenase;
15 44) plasmin --- a gelatinase;
45) plasmin --- a matrix metalloproteinase;
46) plasmin --- a membrane type matrix metalloproteinase;
47) plasmin --- alpha v beta 3 integrin;
48) plasmin --- bombesin /gastrin releasing peptide receptors;
